

Pressure Washer Bowser

Bowser Supply: The No.1 Choice For Water Bowser

**Bowser
Supply**

JET MASTER

Available from stock at Bowser Supply

The Jetmaster is an independent power washer, which can be taken wherever you want to go. With its range of powerful petrol or diesel units available in either 1500PSI, 2500PSI or 3000PSI, it's so versatile. It can clean large earth moving equipment (before leaving a site), portacabins, buildings etc, and with the addition of a simple worm nozzle, it can clean the hardest to get to blocked drains. A sandblasting kit is also available for the removal of graffiti. Its applications are endless.

Tank capacity ranges from 1100 litres and 2200 litres and can be supplied in Full Highway or Site specification.

ALSO AVAILABLE IN
HOT DIPPED GALVANISED STEEL

The durable impact resistant Polythene tank comes complete with a Jetmaster pressure washer of your choice. We offer either petrol or diesel engine washers capable of 1500PSI, 2500PSI or 3000PSI. A worm nozzle or sandblasting kit are also available. The tanks can be supplied in red, blue, yellow and green and can be supplied in 1100 litre capacity.

Each tank has a lockable tamper proof lid, covering 400mm diameter access hatch which incorporates the filler point and vent. The plastic tank is mounted on a galvanised chassis

unit, manufactured from Rolled Hollow Section, fitted with a leaf-spring suspension axle. This unit is manufactured to full highway specification, with overrun and lockable parking brakes and two 185 x 14 x 8 Ply wheels and tyres fitted underneath plastic mudguards.

The hydraulically damped towing unit will be supplied with an eye or ball hitch (to suit your towing vehicle) with telescopic jockey wheel, and a prop stand will be fitted to the rear of the unit. Our standard lighting board unit will be fitted, wired through the

chassis and connected to an international 7 pin plug.

The bowser can also be supplied as a site model. This is designed primarily for off-road use and will be fitted with an unbraked axle. Suspension, mudguards, brakes and lights are not supplied.

The bowsers can also be supplied with a hot-dipped galvanised steel tank for larger units, ie. 2200 litres, gloss painted in a colour of your choice.
